

# Audiometrics Reporting & Tracking

**Ensure proper tracking and management of records with the XM Network system.**

- Ensure regulatory compliance with an online, HIPAA-compliance management and reporting system
- Individual and summary reports help maintain and interpret tracking records
- Import records from previous health screening providers for comparisons over time
- Integrate employee, demographic and industry trends to help you benchmark across internal or external sites

**In addition, you have access to highly experienced staff of occupational health audiologists who will help you ensure results are correctly interpreted.**
