

Water Position

PURPOSE

This document formalizes the Cintas commitment to responsible water management.

SCOPE

This commitment applies to all Cintas operations and working Partners, as well the suppliers and vendors we work with every day. In addition, we support our customers' efforts in this area.

POSITION

In addition to our compliance procedures, Cintas is committed to responsible water management through the following specific actions:

- We will evaluate our operations and identify opportunities for water conservation through improvements in process efficiency.
- We will work to identify ways to better utilize reliable, secure, and safe water sources for our operations.
- We will treat and process wastewater as needed to comply with local, state, and federal regulatory requirements.
- We will evaluate water reuse and recycling options for our processes and utilize appropriate options where appropriate.
- We will research new technologies for water conservation in our processes.
- We will research new technologies for wastewater treatment, reuse, and recycling.
- We will engage our suppliers and vendor partners to assist with this commitment through innovation in the products and services they provide us.
- We will encourage our suppliers and vendor partners to responsibly manage water through improvements to their own operations and processes.
- We will collaborate with our customers to support their commitments and goals regarding water management.
